

## Saving Energy Means Saving Money

**We'll Help You Do *More of Both***

We know we need energy to run anything from our everyday household to a corporate company. We're well aware of the fact that it costs money. And

while we *all* would *like* to save more energy, the grand majority of us aren't exactly crunching kilowatts or calculating money-saving scenarios on our energy bills.

FPU, on the other hand, *is*. From expert evaluations to cash rebates on efficient appliances, see how we're devoting even more of our company brains and dollars—to make saving energy and money an even bigger no-brainer for you.

*See reverse side for  
more information.*

## Cash Rebates for Homes & Businesses

**HVAC:** Ramp up your heating and cooling R.O.I with **up to a \$100 rebate** on a High-Efficiency AC, Heat Pump or A/C system.

**Solar Photovoltaic:** Power your entire home through solar panels on your rooftop and get up to **\$2.00 per watt** of dc solar PV installed—worth **up to \$5,000 rebate!**

**Solar Water Heating:** Get **up to a \$200 rebate** on your solar water heating installation and reduce annual water heater operating costs by 80% or more each year!  
([cleanenergyflorida.org](http://cleanenergyflorida.org))
